JAIDEV KAMBOJ

Embedded Software Engineer

Embedded C/C++ | Modern C++ | STM32 | ARM Cortex-M | FreeRTOS | ESP32 | JUCE | DSP

Embedded Software Engineer with experience in Embedded C/C++, Modern C++, JUCE and real-time system development. Skilled in designing and developing microcontroller-based systems, IoT applications and audio software using STM32, ESP32, FreeRTOS and hardware interfaces. Strong problem-solving skills with a focus on performance, reliability and clean, maintainable code. Passionate about building innovative embedded and audio solutions.

Fundamentals of Remote Sensing
NASA ARSET · ID: 6321708699JK

EDUCATION

B.Sc. in Information Technology
Kurukshetra University, Haryana
2015 – 2018

PROFESSIONAL SUMMARY

Embedded Software Engineer with experience in Embedded C/C++, Modern C++, JUCE and real-time system development. Skilled in designing and developing microcontroller-based systems, IoT applications and audio software using STM32, ESP32, FreeRTOS and hardware interfaces. Strong problem-solving skills with a focus on performance, reliability and clean, maintainable code. Passionate about building innovative embedded and audio solutions.

WORK EXPERIENCE

Sep 2025 – Present
Karnal, Haryana, India (Remote)

Software Engineer | JUCE Developer | DSP Engineer | Modern C++ | Embedded C | RTOS

Self-Employed · Freelance

- Designed and developed cross-platform audio applications and plugins using the JUCE Framework and Modern C++.
- Implemented real-time DSP algorithms for audio processing, improving performance and user experience.
- Developed embedded firmware for various platforms, integrating sensors and communication interfaces for IoT and robotics applications.
- Worked with STM32, ESP32, FreeRTOS and hardware interfaces for real-time embedded systems.
- Applied modular software architecture, debugging, CMake and Git workflows.

JUCE | C++17/20 | DSP | Embedded C/C++ | STM32 | ESP32 | FreeRTOS

Nov 2022 – May 2025
India (Remote)

Web Developer

Freelance · Full-time

- Designed and developed responsive websites and web applications.
- Developed custom functionality using HTML, CSS, JavaScript, PHP and WordPress.
- Optimized website performance, usability and responsive layouts.
- Customized WordPress themes, plugins and WooCommerce functionality.
- Handled website maintenance, troubleshooting and client support.

HTML | CSS | JavaScript | PHP | WordPress | WooCommerce | MySQL

Oct 2018 – Mar 2020
Hybrid

Sales And Marketing Specialist

HARMAN

Harman Professional Solutions India · Full-time

- Developed and maintained strong client relationships in the Audio Visual (AV) and Live Sound sectors across North India.
- Conducted engaging product demonstrations to showcase the capabilities of HARMAN Professional Solutions' offerings.
- Focused on driving sales growth through strategic marketing initiatives and customer engagement.

PROJECTS

JaidevKambojDJPlayer (JUCE)

GitHub >

C++ | JUCE | DSP | Audio | CMake

Professional DJ player built with JUCE. Features dual decks, real-time audio mixing and DSP-based audio processing.

ESP32 Industrial IoT Environmental Monitoring Gateway

GitHub >

ESP32 | I2C | Sensors | IoT | Wi-Fi

Monitors temperature, humidity, pressure, light, sound and distance in real time. Designed for industrial and environmental applications.

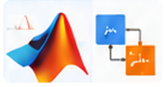

STM32 Smart Vehicle / Environment Monitor

GitHub >

STM32 | Sensors | Embedded C

Real-time monitoring of environment parameters with display and sensor interfaces.

DSP Signal Processing (MATLAB/Simulink)

GitHub >

MATLAB | Simulink | DSP

Designed and simulated audio signal-processing algorithms and filters.
